

# **Project Charter - getFit**

**Rishabh Mittal , Gurumukh Uttamchandani,  
Neeraj Agrawal, Ishan Shah, and Jai Nalwa**

## **Problem Statement**

There has been an every increasing trend on fitness and health in recent years. However, it has become extremely difficult to find the time and the motivation to workout regularly. Today, even with the multitude of fitness apps present, there is not a mobile platform that allows to connect with fellow fitness enthusiasts. Many students and faculty on various campuses own a smart-phone that they always carry on them. With the introduction of this application college students and professors around the country can now live a fitter life.

## **Project Objectives**

- To allow users to find friends to work out/train along with
- Choose from a collection of base workout schedules
- To connect with nearby users, in need for a workout partner
- Usability of setting reminders and notifications
- To allow for users to track and compete with their friends (in order to stay motivated)
- Allow for users to create and share custom workout plans

## **Stakeholders**

Stakeholders for this project is

- Fitness Enthusiasts
- Students at various universities
- Faculty at various universities
- External organizations that wish to promote their own fitness plans

## **Project Deliverables**

A client in form of an Android mobile application that help's connect with fellow fitness enthusiasts while also containing information about workout plans. The mobile application will access a server and from it retrieve/write the necessary information, such as e.g. saving your workout plan or finding nearby users to connect with.
